

*As August draws to a close,  
Fall  
brings us a unique and rich planting season!*

As much as I intend to squeak the last days out of summer, I'm secretly anticipating the cool crisp days of fall!

The summer pots have grown tired and are ready for their transformation to the warm colors and plants of autumn. You can choose the traditional mums, or add in kale, ornamental peppers, asters, or rudbeckia for a change. If you have ornamental grasses or coleus in your pots now, I can add to it for a fresh and dramatic look.

Planter prices range from \$25 to \$55 depending on the number and type of plants you choose. It's not too late to sign up for our **Winter Storage Program**. I provide storage of your winter planters free of charge when all three seasons of service are selected (the number of planters you desire can vary from season to season). When you are finished enjoying your winter plant displays, simply let me know and I will pick up and store them for the remainder of the winter. Planters will then be returned in the Spring with fresh, new soil and beautifully planted flowers!

If the temperatures stay cool, I anticipate fall planting to begin the second week of September so please email or call soon to ensure a spot on my planting schedule.

Looking forward to seeing you soon!

*Ann*
